

Students learning from home

The school uses a variety of websites and services to assign work to students and share learning resources. If you visit the school website (www.kingethelbert.com) and click on the **Students Learning from Home** button, you will find all the links that students might need to access those services.

Useful links that will be displayed:

Students are already familiar with these services and should have the usernames and passwords they need to access them. If there are any problems logging in to those services, there's also a link on the Intranet to the IT Services site where students can log a request with our IT team or email itservices@kingethelbert.kent.sch.uk. Passwords for these systems can be reset and emailed to the student's school email account. For security reasons, if the password to their email account needs to be reset, this will be emailed to the parent/carer email address we have on our systems.

For more information about Google Classroom email summaries for parents/carers please click this [link](#)
